

ASTONPOOL HOLSTEINS

ASTONPOOL
HOLSTEINS

'Bringing Elite Genotype & Phenotype Together'

Welcome

Introduction

At Astonpool Holsteins, based in Staffordshire, UK, we milk 120 Holstein cows alongside a small number of Brown Swiss, through two robotic milking units, averaging 42 kg per cow per day at 4.0% butterfat and 3.3% protein. Our breeding philosophy is centred on producing highly productive, long-lasting cows with great capacity and strong mammary systems that suit a high-yielding, voluntary milking system. We actively exhibit cattle at shows across Great Britain and were delighted to achieve a major milestone in 2024, winning our first national show class with Astonpool KD Elsa.

Over the past nine years, we have invested in elite genetics from around the world. This has led to ownership of cattle in the UK, the Netherlands, and the USA, and to the sale of Astonpool genetics into 11 different countries worldwide. We are particularly proud to be the home of:

Glenirvine Unix Sally's highest Conformation daughter
Eixdale Pwrrup Alongside's highest Conformation daughter
The only daughter of Cutting Edge T Delilah located outside North America
Alongside several high-ranking PTAT, TPI, and Conf females

We hope you enjoy exploring what Astonpool has to offer. With new and exciting donors regularly joining the herd, it can be challenging to showcase everything we have available, so we encourage you to get in touch—whether via Facebook, our website, or by phone if you have any questions.

Visitors are always welcome.
